PASCAL MIETLICKI

System Administrator / Application Integrator / Kubernetes Administrator

A FEW WORDS

The research and implementation of technical solutions, the management of projects and the sharing of technical and functional knowledge are subjects that I am passionate about and that I have been putting to good use for over 15 years.

RECENT PROJECT

Implementation of a virtualization solution under Rancher
Complete Docker application virtualization solution based on a cluster of servers via the Rancher tool and kubernetes. Deployment of infrastructure services (ipsec, nfs, haproxy) and a database cluster under Stolon (symmetrical synchronous replication) in high availability with backup (NFS replication and SQL dump).

SKILLS

Computer Science
Langges : Java, Javascript, PL/SQL, PHP, Perl, Bash, Batch, VBS
Framework : Laravel 4 et 5, IONIC 4, WebDev, Angular JS
Virtualization : VMware, Rancher, Docker, Kubernetes
Web Server : Apache, Nginx, Caddy, Tomcat
Databases : Oracle, MySQL, DB2, PostgreSQL
Management Sciences : Market research, marketing, finance, project management, strategy
Languages
English: fluent
Spanish: fluent
